

GRASS – Konferenz in Warszawa 25th and 26th Sept.

Structure:

1. Short overview on our Farm:

- Cows
- chicken
- pigs
- bees
- horses
- all kinds of cheeses
- bakery
- meat
- direct marketing
- alternative energy
- vacation on the farm
- public relation (farms instead of “agro-factories”)

2. Agriculture

- many different cultures
- mixed cultures
- plowless agriculture
- humus building with mulch, manure, slurry and between fruits
- forage cropping with clover, alfalfa and lucerne mixture
- soil fertility with biodynamic preparations and effective microbes

3. Agroforestry

- Planting and tree care
- agroforestry between the trees
- using with the cows
- harvesting the trees
- economical advantages
- problems with local and EU administrations
- problems with the “local players”
- positive effects to the cultures
- positive effects to biodiversity
- positive effects to the landscape
- positive effects against erosion
- next plans

4. Summary

- Agroforestry is an important element to get back the natural balance in agroforestry systems and helps us on the way to a “closed circle farming” with no problematical inputs and also no output that wastes any kind of our environment.

Thank you very much for listening
