

## BIO

### Marko Reinikainen

Managing Director of the Air Pollution and Climate Secretariat AirClim ([www.airclim.org](http://www.airclim.org)) in Gothenburg, Sweden. Has a PhD-degree in Ecotoxicology and Environmental Biology, and is Associate Professor in Aquatic Environmental Biology. Has worked extensively on environmental issues in both marine waters (especially the Baltic Sea) and in lakes. Current focus in AirClim is on ocean acidification in the wake of climate change. This work deals with capacity building within NGO-networks, with outreach to policy makers (e.g. through EU-contacts and the IPCC), as well with synthesizing and popularizing studies on ocean acidification. In this work, also extensive networking with the scientific community is included, through participation in large projects and networks.
