

# Coalition Clean Baltic

FOR PROTECTION OF THE BALTIC SEA ENVIRONMENT

## **Activities preparation for MONDAY, 29 June.**

Keep an eye on [the OCB 2020 main page](#) for any updates to the program. Please clear your calendars for the week if you can! OCB is an intense program that asks a lot of your attention. Be aware also some of the talks will be livestreamed on Youtube and Facebook, and some CCB members may join different talks through the week, especially concerning Results Based Management.

## **ZOOM INFORMATION**

The zoom link\* for this week will be the same for all meetings. Please check out the tips for Zoom.

## **Short personal introductions, Monday morning**

When we meet on Monday, after welcoming you, we want to hear from you. No media, no PowerPoint, but speaking from your own experience. You can touch on the questions below, or share something else as you feel inspired. At most 5 minutes each.

- Where have you come from and from which supporting CCB member (or on your own)?
- What are you passionate about?
- What is the Baltic to you?

## **Clean Games**

Clean Games is a team-based litter clean-up competition, based on points awarded for diversity and volumes of collected waste. Clean Games events teach participants about pollution, involve more volunteers in making local parks, seashores and recreations a better place. Events change people's attitude to volunteer clean up — now this is a fun event with activities and prizes. Due to the pandemic of COVID-19 we can't hold public events for big groups. So we have developed a decentralized Clean Games, which you will try during OCB 2020.

Participants make photos of cleaned territories and post photos in our mobile app. At the end we check who was the best and make an online award ceremony.

Please visit the website <https://cleangames.ru/> and download the app appropriate for your smartphone. Also, consider areas near you where you can operate as a 1-person team during the mini-clean games Monday afternoon. You can choose the coast, a river, a stream, a drainage ditch, anywhere where water flows since it all, eventually, flows to the Baltic.

## **The Story of Plastic**

We have a link\* for a limited screening of the film “The Story of Plastic” a detailed look into the environmental damage and human rights abuses that occur throughout the lifecycle of plastic. We will discuss this Monday evening following the Clean Games event, and we ask you to watch this film before

OCB begins on Monday. When you click the link, be prepared to watch the film, 1 hour and 35 minutes, all the way through. Thanks!

**Plastic Free Ocean conference**

We also invite you to examine materials from our final Plastic Free Ocean conference, at the following link.  
<https://ccb.se/?event=plastic-free-ocean-final-conference>
